

## “Q4bis Analysis Web Designed for Management is a great analytical tool that enhances the business intelligence features of SQL Server 2005”

*Lucas Searle, Product Manager for  
Windows Server System, Microsoft New Zealand*

### The Compelling Benefits of Q4bis Analysis Web:

- ☑ Empowerment for management and business users
- ☑ Speed of implementation and deployment
- ☑ Immediate return on your Business Intelligence Investment
- ☑ Easy and faster access to critical business information
- ☑ Improved ability to make better informed decisions
- ☑ Dramatic improvement in productivity of both your Business Intelligence users and Business Intelligence support staff
- ☑ Reduction in implementation time frames, resulting in a substantial reduction in Business Intelligence costs

## Business Intelligence Solution for the Manager is Now Even Better with “Q4bis Analysis Web”

*“Q4bis Analysis Web is a business intelligence tool that empowers managers and the business users to be able to access, analyse and take action on critical business information.”*

*Mark Palmer, Business Intelligence  
Manager, Frucor Beverages Ltd*

*“The key to Q4bis Analysis Web is simplicity. Q4bis Analysis Web addresses a major requirement of our customers – the ability to easily analyse masses of data, especially sales data, and view key performance criteria. Many other BI tools are either limiting or complex to use. With Q4bis Analysis Web you can see exactly where you are and where you have come from when analysing data, which is vitally important in deciding where you need to go next.”*

*Duncan Cox, Director  
Adaptable Solutions*

*“With the Q4bis Analysis Web solution set, we now have the ability to not only react to the market, but to be two steps ahead of the game by building flexible decision-making tools to assist with all levels of our business decision making”*

*Maureen Maloy, Manager of the Systems  
Support Group (SSG), A&R Whitcoulls Group*

## The Compelling Features of Q4bis Analysis Web:

- ☑ Out of the box Library (portal look & feel) of predefined business templates covering most (80 to 90%) of standard business information requirements
- ☑ Ability to “apply” these templates to Your Own data by a single mouse click
- ☑ More powerful multidimensional interface
- ☑ Rich functionality for analysis and reporting
- ☑ Ability to analyse multiple time periods within a view
- ☑ Layering - Up to 8 quadrants with enhanced multi dimensional analysis and filtering
- ☑ Custom expression - You can define calculation rules
- ☑ Excel / reports can have ‘drill down’ facilities and many more
- ☑ Enhanced graphical capability
- ☑ Multi selection of rows and levels within a dimension for focused analysis.
- ☑ Integration of reporting services with a one click report creation and report deployment
- ☑ Q4bis Analysis Web world class design provides management and business user the ability to access a new data mart with no technical training
- ☑ Managers and business users can now design and deploy reports, easier and faster than ever before
